

- Body colour : white
- Disinfection efficiency: about 15m²
- Lifespan: 8000h
- Comprehensive disinfection time: 2h
- Supply voltage: 220-240V
- Ingress protection IP 20
- Rubber cable 5m (H07RN-F)
- Ergonomic movable handle
- Adapted for mounting on a Future Stand tripod
- Dimensions (A/B/C) [mm]: 230/340/110

UV-C Sterilion lamps emitting ultraviolet light are one of the most effective devices capable of removing viruses, bacteria, fungi from the surface or destroying the DNA or RNA of any exposed microorganisms. It is enough to direct the UV lamp directly onto the surface for a specified time to effectively kill microorganisms. They are so powerful that they may produce harmful effects on human skin or eyes. Therefore, basic safety precautions should be observed when using UVC lamps for disinfection, i.e. you should not stay within the range of the light beam.

Lamps with power 36 W will disinfect a space of about 15m². There are recommended for use in healthcare facilities, grocery stores, public and private means of transport, at petrol stations, in courier companies, public administration and educational establishments and at private homes and cars.

Accessories

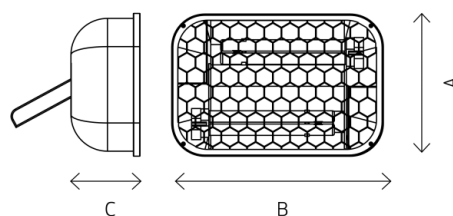

Future Stand tripod

Mounting without tools
